

mesa·az Transportation Advisory Board Report

Date: September 15, 2015
To: Transportation Advisory Board
From: Renate Ehm, Senior Transportation Engineer
Subject: Informational Updates on Recent Parking Prohibitions

Purpose and Recommendation

To streamline the Transportation Advisory Board agenda and remove information that has little value, it is recommended to stop reporting recent parking prohibitions that have been approved by the City Traffic Engineer since the last Transportation Advisory Board meeting.

Background

In February 2008, the Mesa City Council passed an ordinance that delegated authority for determining parking regulations to the City Traffic Engineer, rather than requiring a specific ordinance for each parking regulation change.

As part of this procedural change, a list of the parking prohibition changes made since the last Transportation Advisory Board (TAB) meeting has been provided on the TAB agenda. The intention of this listing is to give Board members an opportunity to raise any concerns or questions.

Discussion

In the approximately seven years since the parking prohibition changes have been listed on the TAB agendas, none of the changes have been appealed or opposed by residents and Board members have not raised any concerns or questions about the listed parking prohibitions. The majority of the parking prohibitions are routine day-to-day operational items, and items that are contentious are brought to the TAB for review.

Alternatives

Doing nothing is an alternative in which case informational updates on recent parking prohibitions will continue to be listed on TAB agendas.
